# BLENDING TECHNOLOGY WITH SERVICE

Soutt Technologies offer you the strength of a global perspective where you can enjoy the shared experiences and know-how of our global partners.

Through our partnerships, we are able to provide consistent, high-level solutions that are reliable, economical and maintain the highest quality standards. It is the initiative and responsibility shown by our trained staff that makes the difference for our customers. We back up their commitment with the willingness to go the extra distance to make sure the large and small projects we undertake is performed flawlessly.

Our relentless commitment to technically innovative products enables us to ensure that your business is benefited by the latest in technological advancement.

# MUSEUM EXHIBITION TOURISM PRODUCTS

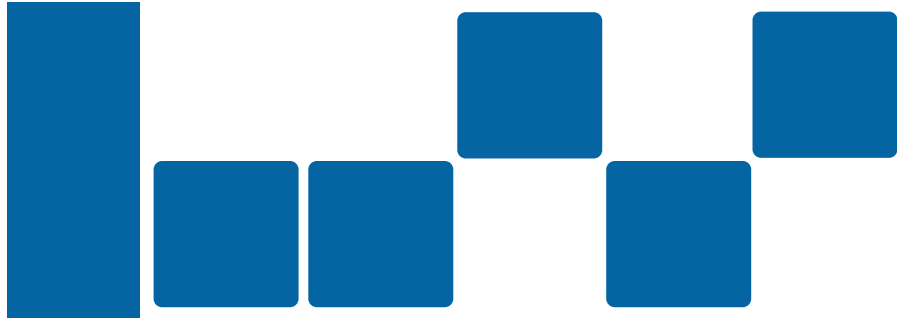

## AUDIO GUIDE

Soutt has partnered with RSF Europe, one of the world's leading producers of Audio and Tour Guide systems and audiovisual equipment, in providing the largest and the most innovative range of audio guides in the market. More than 600 museums, galleries, heritage sites and archeological parks are enjoying quality tours with the products provided by RSF.

Our new hands-free multimedia interactive audio guide offering has an extensive ability to interact with the latest multimedia technologies. This allows for seamless integration between audio, video, lighting and computer applications.

## DIGITAL TOUR GUIDE

The most comprehensive and complete range of Tour guides. For both guided and self-led tours, we offer systems that can be simple or fully interactive including audio synchronization with video and other audiovisual stimuli. Our Tour guides enable complete solutions tailored to the needs of each individual client.

The wireless tour guide system allows addressing several groups of visitors clearly and discreetly in open and busy environments. The Tour guides spread a sound message (pre-recorded and/or by microphone) to a different languages visitors group standing in the same space. With no moving parts, latest technologies and high quality components, nobody except Soutt gives you such light, ergonomic and value for money products.

# AUDIO VIDEO SOLUTIONS

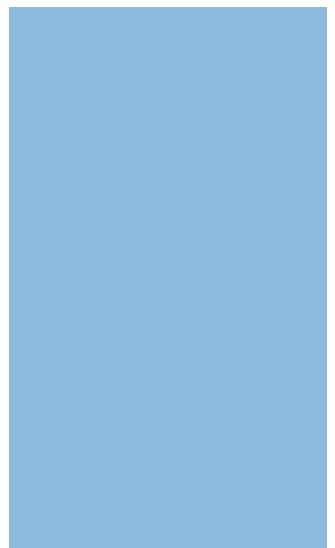

We are specialist Audio visual integrator supplying clients with professional solutions to meet their needs. Our experience in AV Solutions creates a customized system for our clients that best meets their current requirements and fits with plans for the future.

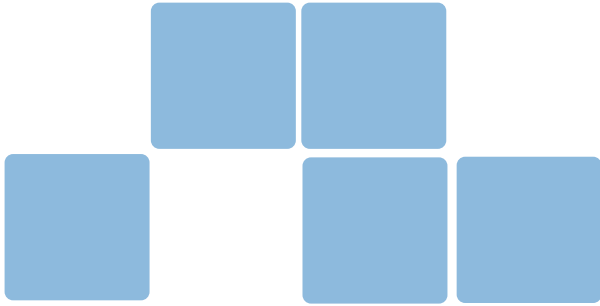

Contact us for communication solutions that address the needs of small and medium business as well as large enterprises.

## CONFERENCE ROOM –DESIGN AND INTEGRATION

Whether you are looking to design a fully integrated conference room system with projection screen and advanced IT control or a basic system for a small meeting room we have range of solutions to suit your requirements.

Our expertise ensures seamless integration of voice, video and data presentation technologies.

## DIGITAL SIGNAGE SYSTEMS

Digital signage is the remote-controlled distribution and playback of digital content on networks of displays ranging from small screens to digital billboards. We can provide turnkey Digital Signage Solution which is both cost effective and meets your business objectives. You can tap into our partner resources to access the expertise and competence of the leading names in Digital Signage Solutions.

SOUTT TECHNOLOGIES provide solutions that help customers to communicate effectively via an integrated network media approach.

Our solutions are flexible and scalable allowing any business user to operate them. Digital signage maximizes the impact of your message and allows you to reach your audience more effectively and profitably.

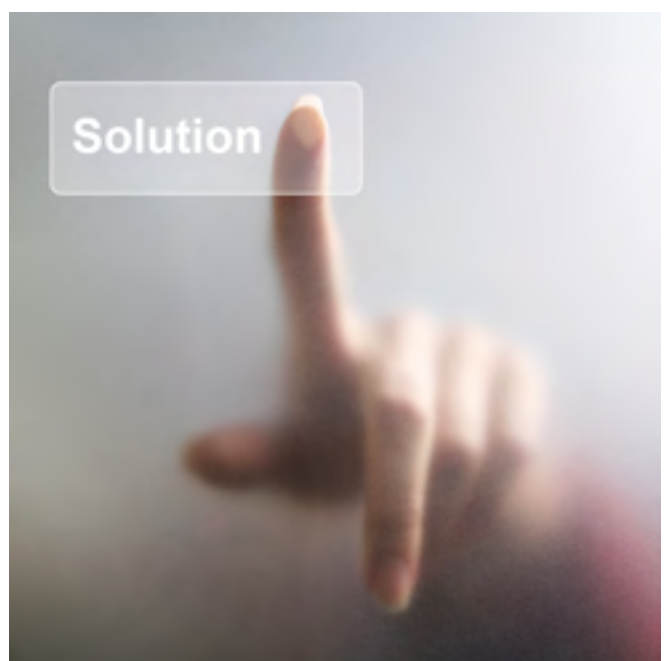

## ACCESS CONTROL & TIME ATTENDANCE SYSTEM

We have the solutions whether you are looking for a biometric time and attendance system, computerised time recording or simply a traditional time recorder machine. We offer affordable cost effective Access Control Solutions that utilises the very latest Biometric fingerprint and Smart Card Technology giving you peace of mind that you are doing all you can to ensure your business premises and staff remain safe and secure at all times We can also provide end-user training on system selected to ensure you get the very best from your investment.

Access control systems can function as stand-alone or through an online networked PC based system that provides the user with flexibility to restrict access and create reports. We can provide fully featured access management applications that provide a full range of integration options.

WE CAN PROVIDE FULLY FEATURED ACCESS MANAGEMENT APPLICATIONS THAT PROVIDE A FULL RANGE OF INTEGRATION OPTIONS.

## CCTV AND SURVEILLANCE SYSTEM

We provide CCTV security surveillance solutions for different business entities and homes to address their security requirements. We partner with reputed security equipment suppliers and provide competitively priced products with our highly professional service

In line with our commitment to provide the very best security service to the customers, we advise you on the optimum combination of CCTV surveillance cameras, recording equipment and lighting to protect your business from security threats. We focus your security system with a solution based policy rather than simply letting the technology lead. Because of this, we give you what you need at the best possible price.

# DIGITAL AND IP TELEPHONE SYSTEMS

The type of telephone system you choose should support the type of business you run. Whether you are looking for a traditional telephone system, hybrid system or full voice over IP solution, Soutt Technologies have qualified, trained and experienced personnel in delivering the right system at the best price for your business.

Digital phones have improved capabilities over analog phones, but are not necessarily IP-enabled. By maximizing on the convergence of voice and data over Internet Protocol, IP telephony enhances business agility while driving down cost. Digital phones are well designed and support PBX systems. IP phones, on the other hand, are built to support IP first and telephony second.

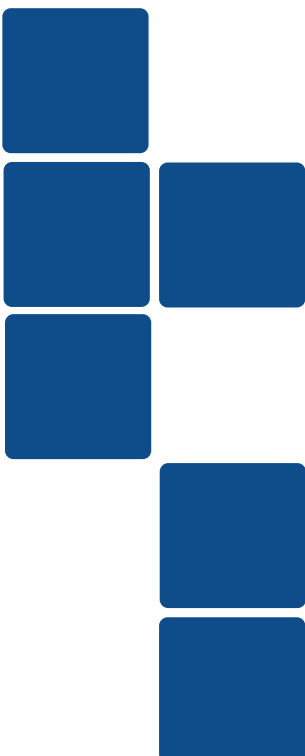

## SPECIAL VALUE ADDED SERVICES

Soutt Technologies is committed to offering the most complete service possible. We bring value, not just through the delivery of products and systems integration but also through the provision of additional services that boost customer retention and development for our clients.

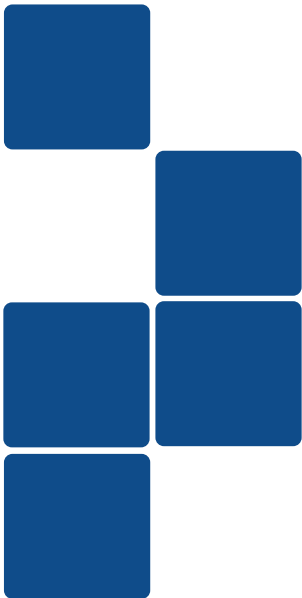

This can include:

- Design supply and manage
- Project management
- Implementation and management of special projects
- Resource supply and operation of projects
- Outsource technical and operation staff

We can undertake staff training and offer consultancy on integrated solutions. Such value added services allows you to take advantage of our unique combination of expertise, advice and support.

# VEHICLE TRACKING AND FLEET MANAGEMENT

We provide solutions to reduce fleet costs and improve mobile workforce efficiency. We represent a leading European Fleet Management Solutions manufacturer. The vehicle tracking devices can be installed on cars, trucks, buses, vans, trailers, construction equipment, boats and almost any other mode of travel vehicle that you may desire to monitor.

## **BENEFITS**

- Reduce Fuel costs
- Increase Fleet Security
- Improve Customer Service
- More Productive Fleet
- Reduce Overtime

Competitive pricing. Professional services.

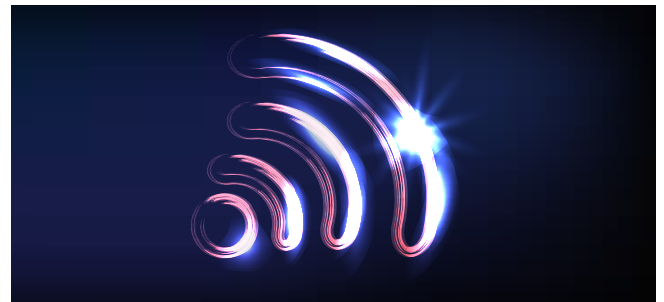

## IT SOLUTIONS

### WIRELESS NETWORKING

Wireless mobility increases productivity through access to network resources from any location. Convenience, Mobility, High Productivity, Expandability, Reduced Cost and Easy Deployment are the major factors that give wireless solutions a competitive advantage over wired connectivity. We can provide a range of Wireless communication and Networking solutions.

Our considerable expertise enables us to provide the highest level of project quality required to meet the diverse demands of sophisticated technological ecosystems.

Fixed wireless technologies enable organizations to achieve broadband connections between multiple locations without the costs, delays and other issues associated with traditional leased circuits. We offer our network solutions based on individual needs and budgets, taking into account where users are located and what they need access to. This means that you will have a network that is built around what is right for you as a business.

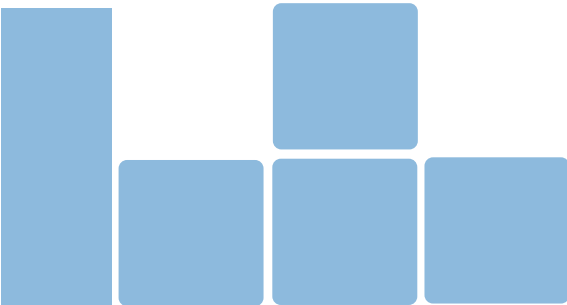

OUR MISSION IS TO PROVIDE THE MOST SECURE WIRELESS NETWORKS THAT RUN DATA AND VOICE APPLICATIONS TO HELP YOUR ORGANIZATION EXCEL.

## STRUCTURED CABLING

The cable infrastructure in your office or building is a critical component of your entire network. Proper planning, installation, and maintenance of this infrastructure can have a positive impact on your company's day-to-day operations and can contribute to its success. We help to install wide variety of cabling media including Fibre Optic Cabling and Low-voltage Cabling.

Structured cabling systems are becoming increasingly complex and sophisticated. New systems have to meeting greater demands and workloads and with emerging connectivity developments structured cabling system tolerances are becoming ever more stringent.

In the present era of convergence of data, voice, controls, management and audio visuals, a robust cabling infrastructure is essential for the new buildings where such convergent technologies are implemented.

Installations are carefully managed to cause the minimal disruption to your business. We've developed a consistent proficiency in the installation of structured cable systems.

## RESTAURANT PAGERS

Soult Technologies offers Pagers and Pager Systems designed specifically to meet the needs of restaurant, leisure and hotel operators. In an industry where customer service can make or break a business, it pays to invest in our Paging System.

The Paging System is very easy-to-use device, which allows customers not to wait near the counter or table until the free table appears or until their order is ready to be served. Moreover, restaurant pagers promote a quiet peaceful atmosphere. At the same time, with the help of such system it reduces the wait time and increase table turns. This in turn helps the business revenues improve dramatically. Clients can use the pagers to advertise their business. We have pagers at a price businesses can afford.

**BEYOND SYSTEM INTEGRATION AND SOLUTIONS, WE CREATE BETTER OUTCOMES**

SouTT Technologies Team has deep expertise in matching customer needs with optimal products.

While every customer's need is unique and every project is a custom solution, the common denominator is 'the most effective technology blended with Customized Services'. Recognizing that customer satisfaction drives usage, we work with your team and organization to train end-users and ensure that the end result is comprehensive solutions.
